

# Manage Your Compressed Air Systems

**MANAGAIR®** is a unique control package designed to automatically monitor and control your compressed air system 24 hours a day. **MANAGAIR®** takes advantage of all the data gathered to significantly improve system efficiency and reliability while minimizing maintenance costs and downtime at the same time. **MANAGAIR®** makes operating your compressed air system easy.

## Benefits of **MANAGAIR®**

- **Continuous Monitoring:** 24/7/365 audit of your compressed air system.
- **Energy Savings:** Enhance efficiency for reduced energy expenses.
- **Remote Reliability:** Improve system reliability with remote monitoring capabilities that can communicate with any make and model of compressor.
- **Cost-Effective Maintenance:** Lower maintenance costs for greater savings.
- **Simplified Operation:** Operate your air system with ease thanks to user-friendly controls.

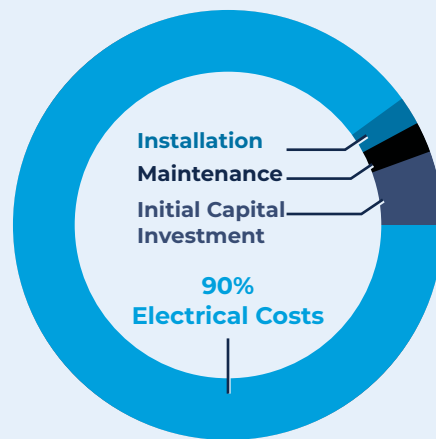

Imagine effortless control of your compressed air system data right from your computer, tablet, or smartphone. Keep an eye on your compressors' performance, spot potential issues early, and boost reliability by staying ahead of maintenance needs. Save on maintenance costs by servicing compressors based on actual requirements, not rigid schedules. Get timely notifications on your smart devices, ensuring you have precise insights into service needs. Effortlessly review your compressors' data on a computer screen or via email, minimizing breakdowns and staying informed. Your compressed air system, your control — simplified.

# Reduce Electrical Costs with MANAGAIR®

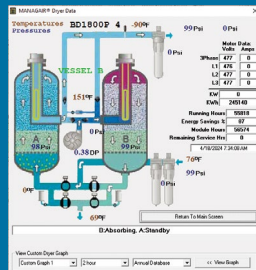

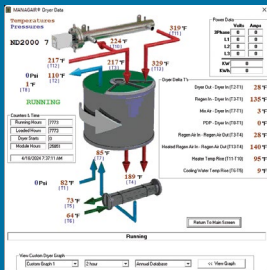

Remotely monitor and control your compressed air system right from your smartphone.

The electrical costs of a compressor comprise up to 90% of the total lifecycle cost for a typical compressor over 10 years.
